

Fire Extinguisher Inspection Certificate APRIL 2024

This certificate confirms that we have completed the maintenance service of your fire equipment listed in accordance with BS 5306: Part 3: 2000

Extract from British Standard 5306-3: 2000

It is recommended that regular visual inspections of all portable fire extinguishers are carried out by the user or users representative, no less than monthly.

The Fire Safety Order 2005 suggest that good practice is to check for correct installation and apparent function on a weekly basis. Inspections should include checks that each extinguisher is located in the designated place, is unobstructed, visible and its operating instructions face outwards, has operating instructions which are clean and legible, is not obviously damaged, has a reading in the operable range or position of any pressure gauge or indicator fitted and has seals and tamper indicators which are not broken or missing.

The user should arrange for corrective action where necessary.
